We the undersigned feel we have a right to know through CLEAR and UNMISTAKABLE labeling of all packaged foods that it has been irradiated.

We understand that PUBLIC INPUT is being accepted as to whether the words "cold pasteurization and "electronic pasteurization" are possible alternatives to the labeling of foods that have been irradiated. This is unacceptable in that it may not be clear to the general public. Please keep it simple and stop trying to hide any facts on how these foods are processed! We demand the clear and simple label that it is IRRADIATED, as well as including the irradiation (Radura) symbol, that would also help to instantly recognize irradiated foods.

The public has a right to know without secret codes or hidden words that food has been irradiated.

Also, we understand that no labeling at all is under consideration for irradiated foods! This is totally unacceptable and we demand that clear labeling be on every food that is irradiated!
